

Liquidity Solution

Introduction

USDBalance - Liquidity Solution

We understand that managing token liquidity is tough. We've built the perfect solution to help projects maximise the liquidity they can unlock. Making sure deep liquidity is available for your ecosystem.

Helping you achieve your long-term mission and short-term needs.

What is USDB?

USDBalance - Liquidity Solution

USDB is a decentralized algorithmic stablecoin that operates through an innovative proof of burn mechanism backed by protocol owned liquidity.

How we maintain our peg:

Arbitrage
bonds

Single sided
deposits &
withdrawals

Treasury
backing

The offering

USDBalance - Liquidity Solution

We offer a 10% discount on your liquidity needs.

Example:

If you need \$1M of liquidity for your liquidity pool. USDB helps you maximise the value gained from your liquidity **by giving you a 10% discount**, meaning you would only have to put up \$900k. This frees up \$100k to use at your discretion in **furthering the development of your project.**

Requirements

USDBalance - Liquidity Solution

At launch, 1% of circulating supply will be locked in our ecosystem for a period of time, as a receipt for transactions.

Next Steps

USDBalance - Liquidity Solution

1

Get in touch: Enter your details on our site USDBalance.com or email info@USDBalance.com

2

Qualifying: Our team will review the project to assess to ensure that they add value to the ecosystem.

3

Execution: We will then proceed with a solution tailored to the needs of the project.
